DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 1. Claims 1-5, 9-13, and 17-21, drawn to a sample clustering method comprising hierarchical clustering and non-hierarchical clustering, and computers and programs on computer readable media therefor classified in class 702, subclass 19.
 2. Claims 6, 7, 14, 15, 22, and 23 drawn to a method of determining the optimal number of hierarchical clusters and computers and programs on computer readable media therefor, classified in class 702, subclass 19.
 3. Claims 8, 16, and 24, drawn to a method of non-hierarchical sample clustering and computers and programs on computer readable media therefor, classified in class 702, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions 1-3 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different method which comprise different steps and produce different results.
3. Because these inventions are distinct for the reasons given above and the search required for Groups 1-3 are not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 1631

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
